SUPPLEMENTARY INFORMATION: Section 455(b) of the Higher Education Act of 1965, as amended (HEA) (20 U.S.C. 1087e(b)), specifies the interest rates charged to borrowers for Federal Direct Subsidized Stafford/Ford Loans (Direct Subsidized Loans), Federal Direct Unsubsidized Stafford/Ford Loans (Direct Unsubsidized Loans), Federal Direct PLUS Loans (Direct PLUS Loans), and Federal Direct Consolidation Loans (Direct Consolidation Loans), collectively referred to as "Direct Loans." The interest rates for Direct Loans may be variable or fixed.

#### Variable-Rate Direct Loans

Direct Subsidized Loans, Direct Unsubsidized Loans, and Direct PLUS Loans that were first disbursed before July 1, 2006, and Direct Consolidation Loans for which the application was received before February 1, 1999, have

variable interest rates that are determined each year in accordance with formulas specified in section 455(b) of the HEA. The variable interest rate formula that applies to a particular loan depends on the date of the first disbursement of the loan or, for some Direct Consolidation Loans, the date the application for the loan was received. The variable rates are determined annually and are effective for each 12-month period beginning July 1 of one year and ending June 30 of the following year.

Except for Direct PLUS Loans that were first disbursed before July 1, 1998, the variable interest rates for most types of Direct Loans are based on formulas that use the bond equivalent rates of the 91-day Treasury bills auctioned at the final auction held before June 1 of each year, plus a statutory add-on percentage. In each case, the calculated rate is capped by a maximum interest rate. The bond equivalent rate of the 91-day Treasury bills auctioned on May 31, 2016, which is used to calculate the interest rates on these loans, is 0.345, rounded up to 0.35 percent.

The interest rate for Direct PLUS Loans that were first disbursed on or after July 1, 1994, and before July 1, 1998, is based on the weekly average of the one-year constant maturity Treasury yield, as published by the Board

of Governors of the Federal Reserve System on the last day of the calendar week ending on or before June 26 of each year, plus a statutory add-on percentage. The calculated rate is capped by a maximum interest rate. The weekly average of the one-year constant maturity Treasury yield published on June 27, 2016, which is used to calculate the interest rate on these loans, is 0.55 percent.

Charts 1 through 4 in this notice show the interest rates for variable-rate Direct Loans that are in effect for the period July 1, 2016 through June 30, 2017.
